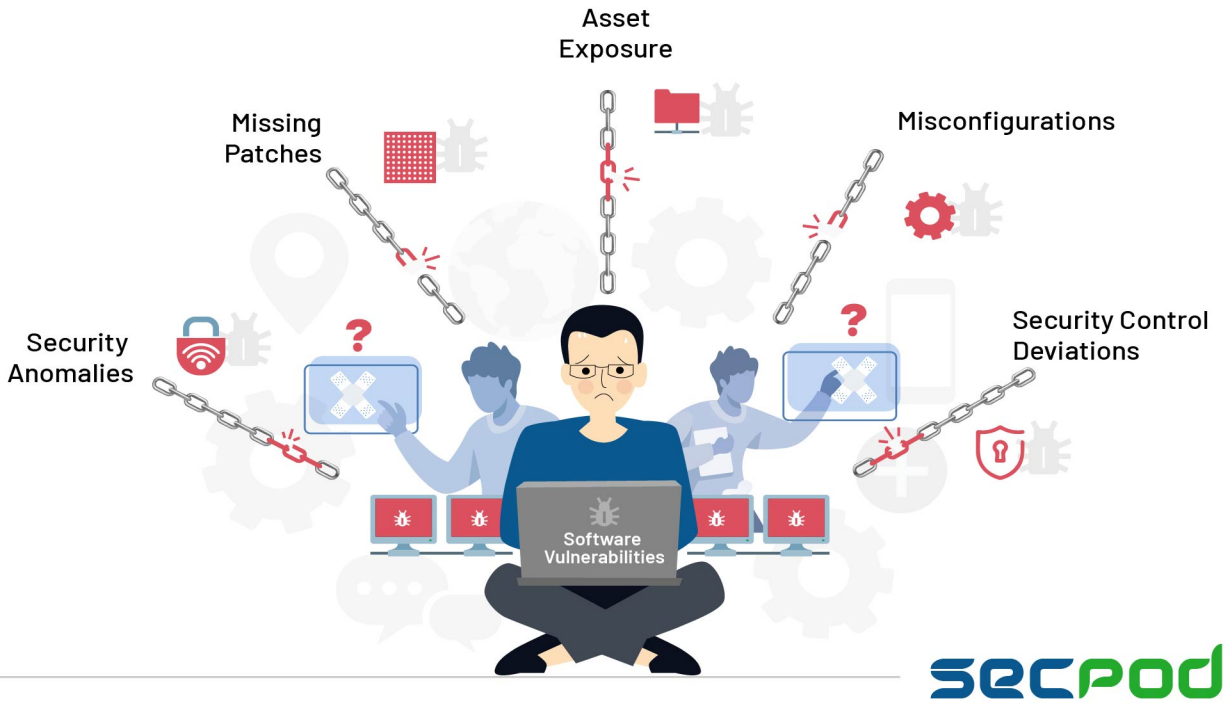
Continuous Vulnerability & Exposure Management to Achieve Continuous Security Risk and Compliance Posture

With a rapid increase in cyberattacks every year and continuous changes in the IT landscape, the modern attack surface is more complex than ever. Attackers are easily invading the enterprise networks through all possible loopholes, putting the enterprises' security and reputation at stake. However, in the past two decades, vulnerability management has not undergone much reinvention or innovation to deal with the evolving attack surface.

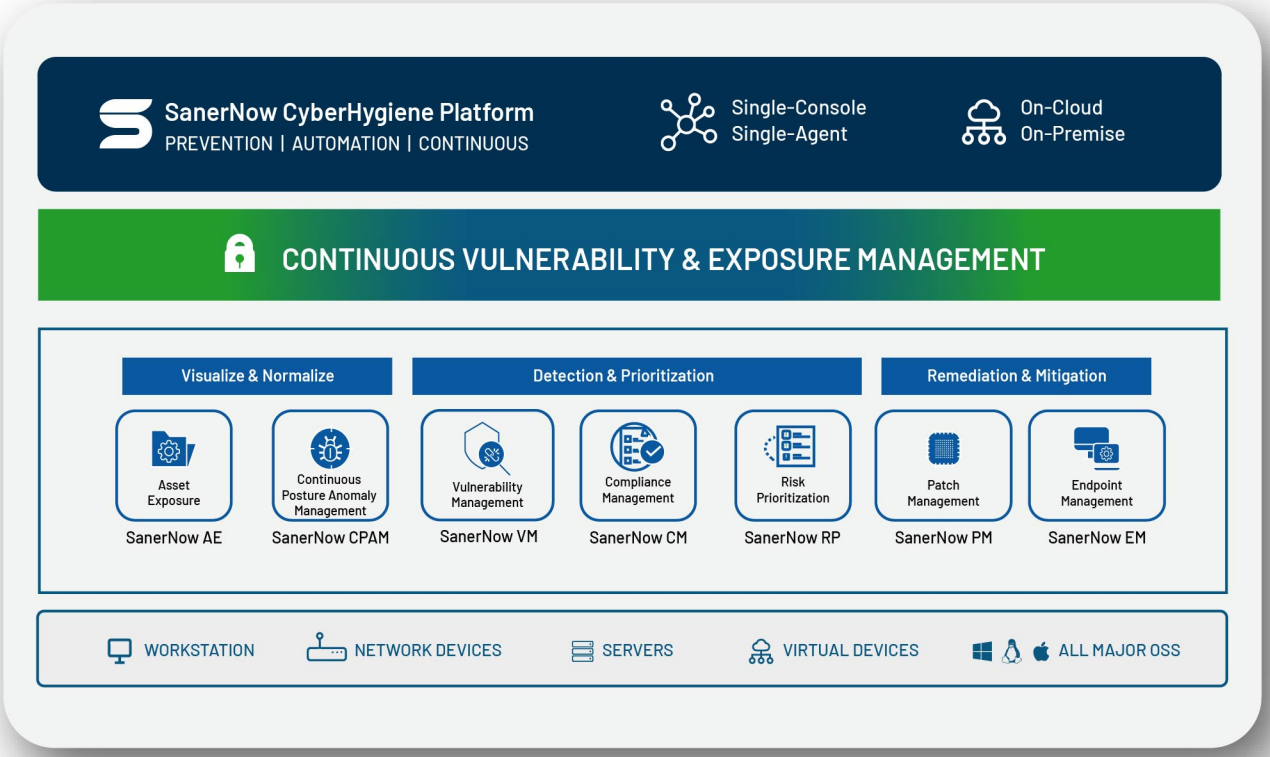
The traditional vulnerability management tools still rely on siloed interfaces, and multiple point solutions approaches, making the process cumbersome and challenging. These tools also provide only superficial visibility into the IT infrastructure with insufficient actionable insights. They also lack capabilities to remediate vulnerabilities, leaving IT and security teams in a dilemma of who will remediate.

And most solutions only look for software CVE-based vulnerabilities alone, leaving behind the other crucial security risks. Numerous security risks exist from a poorly configured setting, exposure to software assets, unauthorized applications and services, missing security patches, deviations in security controls, and security posture anomalies. These security risks are as threatening as a vulnerability and are potential gateways for a cyberattack. It is high time we rethink the definition of a vulnerability and look for an advanced solution that identifies and remediates all types of vulnerabilities from a single place.

Modern IT Security teams need a solution that helps them implement cyber hygiene practices and automate routine tasks to prevent cyberattacks at a radically high speed continuously.



Redefined Vulnerability Management to Manage Risks Beyond Software Vulnerabilities Under One Roof



SecPod SanerNow provides a continuous, automated, Continuous Vulnerability & Exposure Management solution built for the modern IT security landscape. SanerNow reinvents vulnerability management with a deeper and holistic visibility to IT environment, broader approach to vulnerabilities, rapid scanning techniques, vast and accurate security checks, natively built solutions, cyber-hygiene score and end-to-end automation from a truly integrated platform.

We enable IT Security teams to go beyond traditional vulnerability management practices and get complete visibility and control over the organization's attack surface. With SanerNow, you can detect and manage vulnerability and other security risks from a centralized cloud-based console and a single, lightweight, multi-functional agent.

SanerNow is powered by our homegrown, world's largest, vulnerability intelligence database with 175,000+ security checks. SanerNow runs the industry's fastest scans to discover IT assets, exposures, vulnerabilities, misconfigurations, and other security risk exposures. Along with patching, it provides the necessary remediation fixes to mitigate the security loopholes and helps you combat cyberattacks faster than ever.

The New Age Vulnerability Management Solution built for the Modern Security Landscape

Robust, Natively Built, and Continuous Vulnerability & Exposure Management in One Unified Platform

Manage Vulnerabilities, IT assets, exposures, misconfigurations, deviation in security controls, malicious applications and devices, and numerous security risks from a truly integrated, centralized platform. Eliminate the complexities of traversing across a maze of tools and oversee everything from one place.

Best-in-class Vulnerability Management With the Most Trusted Security Intelligence

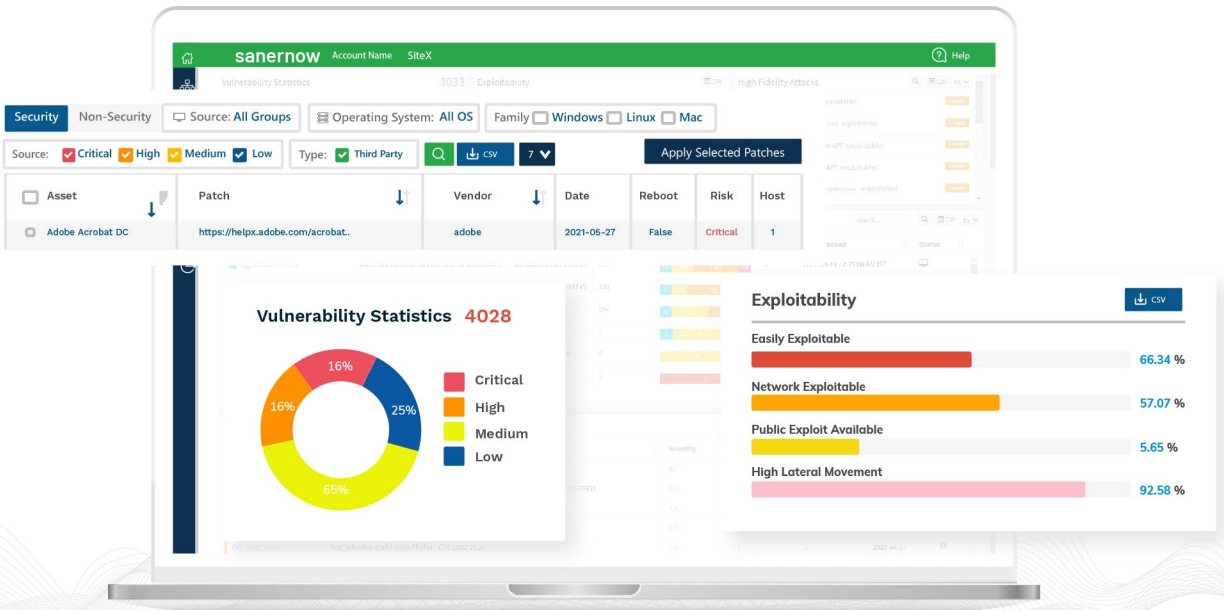
SanerNow is powered by our homegrown, world's largest, SCAP compliant security intelligence library with 175,000+ vulnerabilities. With near-zero false positives, the SanerNow platform comprehensively detects vulnerabilities and risks across all endpoints and network devices.

Experience the Leading Edge of Security Innovation

Leverage the leading edge of security innovation with machine learning, statistical analysis, and deviation computation methods to discover outliers; industry's fastest scanning in less than 5 minutes, truly integrated solution, and end-to-end security automation system. Combat cyberattacks and tighten your security posture with the industry's ground-breaking platform.

One Powerful, Lightweight, Multifunctional Agent for All Tasks

A single lightweight smart agent installed in the endpoints carries out all tasks without consuming excessive bandwidth and system resources. The agent also takes up the role of network scanner to save costs on additional hardware.



Advanced, Automated, and Continuous Vulnerability & Exposure Management for risk-free IT Operations

Real-time Scan to discover IT Asset Exposure

Monitor and track hardware and software inventory, detect outdated & rarely used applications, manage asset licenses, and blacklist untrusted or malicious software to ensure security.

Spot and Eliminate Posture Anomalies

Through machine learning, statistical analysis, and deviation computation methods, spot and eliminate outliers and posture anomalies that threaten IT security.

Holistic and Deeper Visibility and Control Over IT infrastructure

Dig the root of your IT infrastructure and get collective visibility over your IT environment in a way you have never seen before. Get intelligent insights to lay a stronger security foundation.

Comprehensive Security Coverage and Accurate Detection

SanerNow leverages the homegrown world's largest security intelligence library with 175,000+ vulnerability checks. This SCAP and OVAL compliant database provides comprehensive coverage, enabling accurate detection with near-zero false positives.

Industry's Fastest and Continuous Scanning to Discover Vulnerabilities and Security Risks

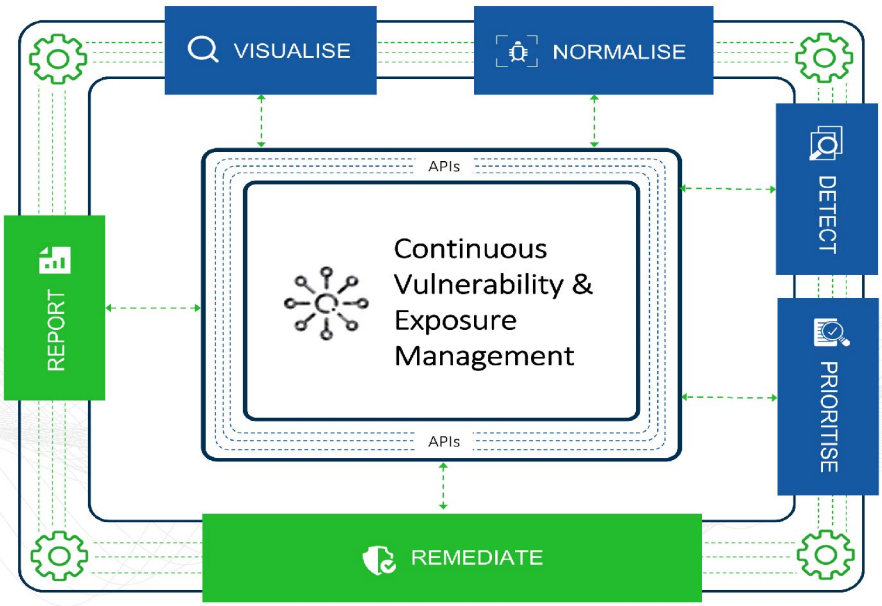
SanerNow provides the industry's fastest scanning to detect vulnerabilities across numerous devices in less than 5 minutes with minimal bandwidth and system resource consumption.

Remediation Controls Beyond Patching

SanerNow enables you to go beyond patching with numerous remediation methods to manage other security risk exposures. You can monitor 100+ endpoint metrics, apply strong security controls, block malicious applications and devices, and more.

Seamless Security Risks Prioritization

Manage and priortize security risks based on SSVC, vulnerability intelligence, machine learning based exploit prediction, kill-chain validation, business context, data analysis and more



Harden System Configuration and Align with Security Compliance

Fix misconfigurations and comply with major industry security benchmarks like HIPAA, PCI, NIST, and ISO. You can easily align your vulnerability management goals with security compliance and strengthen your security posture

End-to-end Automation

SanerNow makes vulnerability management a continuous process with end-to-end automation. You can schedule and automate all tasks from detection to remediation and make vulnerability management a simple daily routine.

Integrated Patch Management for Faster Remediation

Remediate vulnerabilities on time without leaving any security gaps with integrated patch management. SanerNow supports patching for all OSs like Windows, MAC, Linux, and 450+ third-party applications.

Insightful and Customizable Reports

SanerNow organizes all IT and security information in insightful ways for teams to monitor computing infrastructure continuously. With a wide range of customizable reports, 50+ trending reports, and a comprehensive risk assessment report, SanerNow makes reporting and analysis a hassle-free task.

Leverage the Next-gen Vulnerability Management Solution and Prevent Cyberattacks

Cloud-based Platform

The platform is fully in the cloud, aiding seamless management. Available in on-premise variant as well.

Easy Setup

The platform is incredibly easy to set up and can be deployed quickly. You can kickstart your operations in no time.

Truly Integrated & Natively Built

All the solutions in SanerNow are built natively by us, providing you with a seamless experience from a fully integrated platform.

Intelligence-driven Cyber Hygiene Score

With SanerNow Cyber-Hygiene score, quantify your organizational environment and stay aware about the security of your organizational devices.

Cost Efficient & Time Saving

Saves ample time and cost over purchasing and installing multiple solutions for various tasks.

Effective Risk Exposure Reduction

Manage security risks comprehensively and reduce risk exposure to a larger extent.

Improved Resource Efficiency

Optimize the usage of resources in your network and improve overall resource efficiency.
