

Agentic AI Automation Built by Analysts for Analysts

The world's most demanding security teams rely on Swimlane agentic AI automation.

Who We Are

Cybersecurity is more than just a job, it's a mission. Our team has been in your shoes. Swimlane was founded by security experts who understand the daily challenges of SOC teams, CISOs, and security professionals. Over the years, we've applied our automation expertise to IT, OT, and GRC processes so that every security function can benefit from AI automation.

“Swimlane has an unrivaled and uniquely independent role in helping the largest companies in the world transform into AI-driven security programs. We're doubling down on our vision to make agentic AI automation accessible to every security function. It's not just about adding AI, it's about driving better security outcomes and at a price that creates a real ROI for customers.”

Cody Cornell, Co-founder & Chief Executive Officer at Swimlane

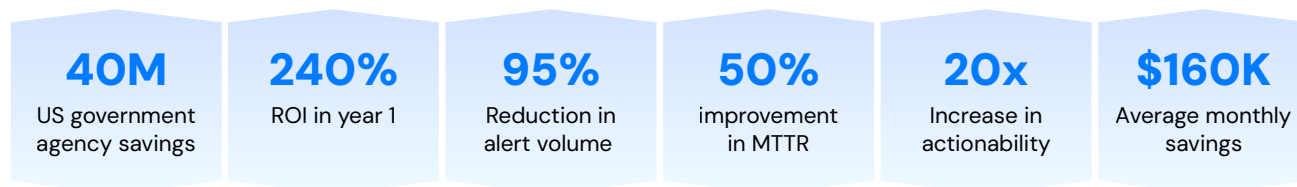

What We Do

At Swimlane, we power the people who keep organizations secure and compliant through a powerful agentic AI automation platform. We believe that the combination of agentic AI and automation gives enterprises and MSSPs the speed, scale, and precision they need to secure every environment, before threats become breaches.

How We Do It

AI automation helps security teams from all industries improve their security and business outcomes. Don't take our word for it, see success stories straight from the source.

Customer Outcomes
